CONTENTS

Session 1A

Folding rulers inside triangles 1
Marc van Kreveld, Jack Snoeyink, Sue Whitesides

The complexity of the compaction problem 7
Zhenyu Li, Victor Milenkovic

On the complexity of assembly partitioning 12
Lydia Kavraki, Jean-Claude Latombe, Randall H. Wilson

Circular visibility and separability 18
Jesús García-López, Pedro Ramos-Alonso

Session 1B

Tetrahedralization of simple and non-simple polyhedra 24
Godfried T. Toussaint, Clark Verbrugge, Caoan Wang, Binhai Zhu

Approaches to high aspect ratio triangulations 30
Mary-Anne K. Posenau

Approximating the maxmin-angle covering triangulation 36
Scott A. Mitchell

A discussion on the triangulation refinement problem 42
Maria-Cecilia Rivara

Plenary Session

Algorithms for ham sandwich cuts 48
William Steiger

Session 2A

On the maximum number of intersections of two polyhedra in 2 and 3 dimensions 49
Michael B. Dillencourt, David M. Mount, Alan J. Saalfeld

On the number of views of polyhedral terrains 55
Pankaj K. Agarwal, Micha Sharir

Geometric orderings and Helly-type theorem for intersecting translates in the plane 61
Jean-Marc Robert

Session 2B

An experiment using LN for exact geometric computations 67
Jacqueline D. Chang, Victor Milenkovic

A "lazy" solution to imprecision in computational geometry 73
M.O. Benouamer, P. Jaillon, D. Michelucci, J-M. Moreau

Efficient algorithms for robust circular arc estimators 79
David M. Mount, Nathan S. Netanyahu

Session 3A

Guarding a treasury 85
Svante Carlsson, Håkan Jonsson

Shortest watchman tours in weak visibility polygons 91
P. Pradeep Kumar, C.E. Veni Madhavan

The minimum cooperative guards problem on k-spiral polygons 97
Bern-Cherng Liaw, N.F. Huang, R.C.T. Lee

The edge guard problem for spiral polygons 103
S. Viswanathan

Session 3B

Perfect binary space partitions 109
Mark de Berg, Marko M. de Groot, Mark H. Overmars

On the union of fat wedges and separating a collection of segments by a line 115
Alon Efrat, Günter Rote, Micha Sharir

Balanced cuts of a set of hyperrectangles 121
Viet Hai Nguyen, Thomas Roos, Peter Widmayer

On vertical decomposition of arrangements of hyperplanes in four dimensions 127
Leonidas J. Guibas, Dan Halperin, Jiří Matoušek, Micha Sharir

Session 4A

Randomizing optimal geometric algorithms 133
Larry Shafer, William Steiger

Optimal slope selection via expanders 139
Matthew J. Katz, Micha Sharir

Lower bounds for the complexity of the Hausdorff distance 145
William J. Rucklidge

Geometric pattern matching under Euclidean motion 151
L. Paul Chew, Michael T. Goodrich, Daniel P. Huttenlocher, Klara Kedem, Jon M. Kleinberg, Dina Kravets

Session 4B

Topological characterization of Hwang's optimal Steiner trees 157
Jocelyn Cloutier, Imed Bennour

Computing constrained shortest segments: butterfly wingspans in logarithmic time 163
David Kirkpatrick, Jack Snoeyink

Computing an area-optimal convex polygonal stabber of a set of parallel line segments 169
Asish Mukhopadhyay, Chanchal Kumar, Binay Bhattacharya

GeoLab: an environment for development of algorithms in computational geometry 175
P.J. de Rezende, W.R. Jacometti

Plenary Session

Arrangements of surfaces in higher dimensions: envelopes, single cells, and other recent developments 181
Micha Sharir

Session 5A

Dominance drawings of bipartite graphs 187
Hossam ElGindy, Michael E. Houle, Bill Lenhart, Mirka Miller, David Rappaport, Sue Whitesides

Area requirement of visibility representations of trees 192
Goos Kant, Giuseppe Liotta, Roberto Tamassia, Ioannis G. Tollis

Maximal outerplanar graphs are relative neighbourhood graphs 198
Anna Lubiw, Nora Sleumer

Session 5B

On critical orientations in the Kedem-Sharir motion planning algorithm for a convex polygon in the plane 204
Klara Kedem, Micha Sharir, Sivan Toledo

On parallel rectilinear obstacle-avoiding paths 210
Mikhail J. Atallah, Danny Z. Chen

Shortest paths for a two-robot rendez-vous 216
Erik. L Wynters, Joseph S.B. Mitchell

Session 6A

Generalized kernels of polygons with holes 222
Sven Schuierer, Derick Wood

Grazing inside a convex polygon 228
R. Venkatasubramanian, Akio Cullum

Looking through a window 234
Ferran Hurtado

On minimum and maximum visibility problem 240
Laxmi P Gewali

Session 6B

Simple randomized algorithms for closest pair problems 246
Mordecai J. Golin, Rajeev Raman, Christian Schwarz, Michiel Smid

A simple algorithm for maintaining the center of a planar point-set 252
Reuven Bar-Yehuda, Alon Efrat, Alon Itai

Maintaining the approximate width of a set of points in the plane 258
Günter Rote, Christian Schwarz, Jack Snoeyink

Semi-dynamic closest-pair algorithms 264
Yossi Matias

Plenary Session

Teaching computational geometry 272
Raimund Seidel

Session 7A

Optimal algorithms to detect null-homologous cycles on 2-manifolds 273
Tamal K. Dey

Acyclic hierarchical cell complexes 279
Michela Bertolotto, Elisabetta Bruzzone, Leila De Floriani

On the minimal number of volume intersection operations necessary for reconstructing a 3D object 285
Aldo Laurentini

An output sensitive algorithm for the computation of shadow boundaries 291
A. James Stewart, Sherif Ghali

Session 7B

Dent and staircase visibility 297
Derick Wood, Peter Yamamoto

LR-visibility in polygons 303
Gautam Das, Paul J. Heffernan, Giri Narasimhan

Recovery of convex hulls from external visibility graphs 309
Hazel Everett, Anna Lubiw, Joseph O'Rourke

On the notion of completeness for reconstruction algorithms on visibility graphs 315
G. Srinivasaraghavan, Asish Mukhopadhyay

Plenary Session

The continuous-graph approach to visibility problems 321
Thomas Shermer

Session 8A

Finding the maximum area axis-parallel rectangle in a polygon 322
Karen Daniels, Victor Milenkovic, Dan Roth

Finding the largest m-dimensional circle in a k-dimensional box 328
Ivan Stojmenović

An optimal algorithm for solving the restricted minimal convex nested polygonal separation problem 334
D.P. Wang, R.C.T. Lee

Session 8B

Constrained Delaunay triangulation revisited 340
J-M. Moreau, P. Volino

On equiangularity of Delaunay diagrams in every dimension 346
Dominique Schmitt, Jean-Claude Spehner

Systematic local flip rules are generalized Delaunay rules 352
Timothy Lambert

Session 9A

Tighter bounds on Voronoi diagrams of moving points 358
Thomas Roos

Near-quadratic bounds for the L_1 Voronoi diagram of moving points 364
L. Paul Chew

A note on generalizations of Chew's algorithm for the Voronoi diagram of a convex polygon 370
Rolf Klein, Andrzej Lingas

On general properties of strictly convex smooth distance functions in $\mathbf{R}^D$ 375
Ngọc-Minh Lê

Session 9B

Reconstructing polygons from X-rays 381
Henk Meijer, Steven S. Skiena

Testing simple polygons 387
Esther M. Arkin, Patrice Belleville, Joseph S.B. Mitchell, David Mount, Kathleen Romanik, Steven Salzberg, Diane Souvaine

Optimal floodlight illumination of stages 393
Jurek Czyzowicz, Eduardo Rivera-Campo, Jorge Urrutia

The floodlight problem 399
Prosenjit Bose, Leonidas Guibas, Anna Lubiw, Mark Overmars, Diane Souvaine, Jorge Urrutia

Plenary Session

Low level issues in computational geometry 405
Chee Yap

Session 10A

Algorithms for proximity problems on colored point sets 420
Thorsten Graf, Klaus Hinrichs

Widest-corridor problems 426
Ravi Janardan, Franco P. Preparata

Finding maximally consistent sets of halfspaces 432
Alon Efrat, Micha Lindenbaum, Micha Sharir

Session 10B

Two-dimensional computation of the three-dimensional reachable region for a welding head 437
Michael McAllister, Jack Snoeyink

How to look around a corner 443
Christian Icking, Rolf Klein, Lihong Ma

Translational motion planning for a convex polyhedron in a 3D polyhedral world using an efficient and new roadmap 449
A. Dattasharma, S.S. Keerthi

Session 11A

Rectangle packing in polynomial time 455
Gunter Bär, Claudia Iturriaga

The lawnmower problem 461
Esther M. Arkin, Sándor P. Fekete, Joseph S.B. Mitchell

On restricted boundary covers and convex three-covers 467
Patrice Belleville

Session 11B

Robust construction of the Voronoi diagram of a polyhedron 473
Victor Milenkovic

A robust algorithm for point in polyhedron 479
C. Bradford Barber, Michael D. Hirsch

Rational orthogonal approximations to orthogonal matrices 485
Victor Milenkovic, Veljko Milenkovic
